

A close-up photograph of a woman with long, wavy brown hair, her eyes closed in a serene expression. She is holding a small, clear perfume bottle with a silver cap. The background is a soft-focus field of pink and white flowers, creating a romantic and elegant atmosphere. The lighting is warm and natural, highlighting her features and the texture of her skin.

# BatchMaster ERP for Fragrances

## Splash scent of efficiency and quality in your business

The global demand for fragrances has been on the higher side in recent years due to increased self-awareness as well as some smart marketing, which has positioned these products as essential part of one's social status and individuality. There's also been a rise in its usage in the FMCG sector, which too has contributed to the fragrance industry's growth. But this growth has also given rise to advent of counterfeit products to the market. This has, in turn, created a need for the manufacturers to maintain quality standards in manufacturing to retain the credibility as well as competitive edge.

To meet these as well as other operational challenges, manufacturers are turning to IT solutions. BatchMaster ERP for Fragrances, a robust ERP solution, fits the bill perfectly as its powerful set of features allow fragrance manufacturers: greater control over their business processes, consistency in formulation, streamlined manufacturing process, generation of reports to facilitate timely decision making, support to new product development, quality control, efficient cost management, bi-directional lot traceability, support to all the regulatory compliances, batch management, et al.

## Products:

### BatchMaster ERP

Our Flagship product, BatchMaster ERP, is a true process-centric solution serving the manufacturing, distribution, finance, compliance and quality needs of your business.

### BatchMaster Point-Of-Sales (POS)

A web-based software solution for wholesale, distribution, and retail businesses, it can be used online on iPads, Android tablets or laptops. By syncing the complete information of products, customers, and orders into a single platform, it makes it easy to scan products, check for inventory, apply discounts or offers, and accept payments both in plastic money as well as in cash. Ultimately, helping retailers improve customer service, increase productivity, reduce thefts and offer better retail experience.

### Integration with MAGENTO:

Integration of BatchMaster Enterprise with Magento helps manage your business online. The integration provides a seamless method to completely collaborate your ERP system with your current or upcoming Magento stores. Via this integration, orders from your Magento store and website will automatically be loaded into the BatchMaster Enterprise ERP solution – along with an alert about order arrival. It enables complete synchronization of item records, price lists, inventory, taxes, business partners, orders, deliveries, shipping & tracking, and payments.
