

# BatchMaster ERP for Organic Food

## Helping you bring purity, safety and health to our lives

In a transition phase from being a niche market to a mainstream one, the Organic Food industry has its own set of peculiar challenges. In such scenarios, there is little help for the Organic Food manufacturers, who, with limited industry knowledge, struggle to keep up with the pace of the changes happening around. BatchMaster ERP for Organic Food, an able ally for them in such times, provides them with all the help they need to meet the requirements of both industry regulators as well as consumers.

# BatchMaster ERP for Organic Food

Its features allow the manufacturers to streamline the supply chain, maintain the demand-supply balance, keep the cost and margin pressures under check, ensure food safety & quality and with it the consumers' sustained faith. Besides, it also takes care of the procurement from certified vendors, sales, inventory, accounting, and overall functions, thus giving the manufacturers greater control over their business.

- Bi-directional traceability from vendor to customer and vice-versa
- Instant recall functionality for better responsiveness and faster audit
- Establish quality checks throughout your supply chain based on your compliance and quality requirements
- Intensive R&D based on what-if variations of nutritional properties, weight, volume and costs
- Material substitution to accommodate seasonal and healthy variants or substitutes
- Optimized production planning through enhanced forecasting, raw material planning and production scheduling
- Full lot tracking from receipt of inbound material lots which are consumed in manufacturing and finally shipped out to customers
- Nutritional Labeling and Allergen Management
- Regulatory compliances
- Shelf-life and 'Best Before Date' management
- Yield management for accurate planning, costing and reporting
- Quality assurance & management for food safety and quality
- Inventory control and management
- Blending and batching optimization
